SURVEYOR'S REPORT

In accordance with Title 865 IAC 1-12 the following observations and opinions are submitted regarding the various uncertainties in the locations of the lines and corners established on this survey.

The Theoretical Uncertainty (due to random errors in measurement) of the corners of the tract established in this survey is within the specification for a Class B survey (± 0.25 feet) as defined in IAC 865.

The purpose of this survey is to replat Stony Ridge Subdivision as recorded in Plat Book 14, page 158 in the Office of the Recorder in Putnam County, Indiana, conveyed to Invest Putnam, Inc. as described in Deed Record 176, page 323, Instrument Number 2006005224, 2006005225 & 2006005226 in the aforesaid Recorder's Office.

The boundary line of Stony Ridge Subdivision Replat was established on a survey by ASA Land Surveying, completed February 3rd, 2005, as shown in Plat Book 14, Page 158 in the aforesaid Recorder's Office. (Stony Ridge Subdivision)

As a result of the above observations it is my opinion that the uncertainties in the locations of the lines and corners established on this survey are as follows:

Due to variances in reference monuments: 0 feet for all interior lot corners. 1 foot to 5 feet for all other corners.

Due to discrepancies in the record description: None found.

Due to inconsistencies in lines of occupation: See plat for location of fence along the East line of the subject real estate.
